CASE 01 · HOSPITALITY & PUBLISHING

Automated Print Books & Hotel Concierge Editions

Challenge: Traditional book & in-room concierge guide layout takes 3–6 weeks of manual InDesign work, leaving widows, loose pages, and costly spine errors.

Solution: Built an end-to-end Python print compiler generating 6×9 paperback/hardcover wraps, 300 DPI monochrome architectural plates, EPUB/DOCX, and strict page-density QA.

Application: Deployed across 8 live Slow Travel books and packaged for boutique hotels as bespoke *Concierge Editions* (property facade plate + local quiet-hour itineraries).

90 pages
0 hollow pages verified

300 DPI
2400×1600 monochrome plates

CHAPTER 02 · IRELAND · MUNSTER · COUNTY CLARE & THE BURREN EDGE

Cliffs of Moher, Hag's Head & Doolin Coast

Plate 02 · O'Brien's Stone Tower & Layered Cliffs of Moher in First Light; 216-meter Carboniferous sandstone walls and turf cliff ledges catching rose-gold warmth ahead of tour coaches.

Dawn Window	05:30 – 08:00	Clarity Months	May – June, September – Early October
Coordinates	52.9715° N, 9.4089° W	Land Character	Namurian shale cliffs, Atlantic swell, O'Brien's Tower, Karst gr kes

1. FIRST LIGHT & MORNING FIELD NOTE

Ten tour buses an hour roll up the R478 visitor incline between 10:30 and 15:30, compressing thousands of day trippers behind concrete viewing parapets beside the main visitor hub. Yet walk north up from Doolin's limestone harbor—or west along Hag's

14

C6. Every major bridge and square lies virtually flat within a 1.5-kilometer compact grid.

Georgian townhouses follow strict visual discipline honed by 1760s lease covenants: red brick facing skyward, granite plinths at street level, tall twelve-pane sash windows dwindling progressively on upper stories, and slender semi-circular lead fanlights crowning solid timber doors.

3. SECULAR HERITAGE & DATED CHRONOLOGY

In 1757, Dublin established Europe's earliest statutory urban planning authority—the Wide Streets Commissioners—cutting broad straight quays, uniform ashlar granite embankments, and symmetrical brick terraces around Merrion Square and Fitzwilliam Square. Coalbrookdale ironfounders in Shropshire cast the three-ribbed iron arch of the Liffey Bridge in 1816, replacing leaky wooden river ferries with a halfpenny pedestrian toll until 1919.

Along the southern perimeter, engineering teams completed the Grand Canal in 1779 and the monumental granite asylum harbor at Kingstown (now Dun Laoghaire) in 1859 using Wicklow Dalkey Quarry blocks to shield cross-channel steamers arriving out of the Irish Sea.

Period	Historical Anchor & Field Significance
1757 CE	Wide Streets Commissioners charter sets uniform Georgian quay heights and square proportions.
1779 CE	Grand Canal opens its Ring's End granite basin locks linking Dublin Bay inland west to the Shannon.
1791 CE	James Gandon completes the Portland-stone Custom House riverfront colonnade along the northern quay.

CASE 02 · AMAZON A+, SHOPIFY & PINTEREST

Luxury 9:16 Product Visuals, Video Pins & Bulk CSV SEO

Challenge: White-background catalog photos disappear in mobile feeds, while agency 9:16 shoots cost thousands and take weeks.

Solution: 3-zone editorial redesign (magazine serif headline, 3 benefit callouts, crisp CTA) paired with 8s FFmpeg 1080×1920 Video Pins, Rufus-safe copy, and ready Pinterest Bulk CSV schedules.

1080×1920
